PREFACE

THE enthusiasm with which the first edition of the *Directory of Bookplate Artists* was received, and the ensuing rapid exhaustion of the edition, justified the opinion that the project would meet a well-defined need in the bookplate world.

A number of suggestions have been offered for illustrating the *Directory*, most of which resolve themselves into proposals for printing one example of each artist's work. However, it is thought that this method would be inadequate because a single example of an artist's work is rarely representative of his talents, and it is now impracticable to extend the work to great length.

Several artists complained that some collectors were treating the *Directory* as a mere exchange list and not even observing the ordinary courtesies of exchanging, such as first writing a letter to determine whether or not the artist cared to exchange, asking for his definite needs in case he should be willing to exchange, etc. Bookplate designers are almost always glad to send examples of their work

for inspection but it should be borne in mind that not all of them are interested in collecting.

The attempt has been to secure from each artist data concerning the media in which he works, the style of design in which he specializes, an approximation of the cost of a design of his workmanship, and some idea of the length of time he has been making bookplates. The information presented in each case has been compiled from the reply received in response to a questionnaire which was addressed to all artists known to be interested in bookplates and which propounded the following questions:

1. In what media do you work?
2. In what style of design do you specialize?
3. About what is the cost of a design of your workmanship?
4. About how long have you been making bookplates?

Only those artists are included who have sent answers to the questions.

Judging by the past, additional revisions of this work will be required and, to this end, additional information and corrections should be sent to the editor.

Macfall, Major Haldane, 1 Perham Crescent, West Ken-
sington, London, W. 14, Eng-
land

"My designs are in wood engraving for bookplates of 'label' quality, *i.e.*, a small bookplate. But for what are somewhat fatuously called the 'more important' bookplates, I use either pen and ink, which approaches the woodcut and comes out well in line process, or if I can get a good gravure reproduction I work with the lead point on a greasy paper which gives a very rich velvety effect, but it has one great drawback that once you put down a touch you cannot erase it without smudging it and playing the cat and banjo with the quality of the thing. I do not care for meaningless and vacuous wriggles or hard tinny 'designs.' I try for a little pictorial or decorative lyric, personal to the owner. I don't think a bull fight fits a charming spinster. If I can, I try to bring in the family arms or legend or the taste or hobby of the owner. I look to make about £20, so that if a gravure has to be made of it the bookplate might cost the owner £25 before done with. A label I could make for about £10—it does not take so much time. The first

DIRECTORY OF BOOKPLATE ARTISTS

bookplate I ever made was a label some twenty years ago; no, it was nearer thirty years ago. No one has shot me so far! The bookplate's bitterest enemy is school-of-artiness. The root of the good stuff lies in the 18th century and that is why the American bookplate is generally so charming. The book label has also its most exquisite birth in the graceful designs of the 18th century."
